

### **Universal trailer connection device**

Allows the use of 12 V trailers on towing vehicles with 24 V operating voltage without having to use a separate load compensation device.

#### **Possible types of installation:**

- on the towing vehicle (12 V socket)
- on the trailer
- or between the two vehicles

#### **Possible areas of use:**

- bicycle transport trailer
- ski-transport trailer
- luggage trailer
- mobile sales stand

Additional installation of trailer control lamps is not necessary since this function is carried out by the C2 control of the existing flasher units.

### **Part number**

**5DS 008 125-011**
