

AST4848 Camshaft Sprocket Remover Set

IMPORTANT: Always refer to the vehicle manufacturer's service instructions, or proprietary manual, to establish the current procedures and data. Product Information Sets detail applications and use of the tools with any general instructions provided as a guide only.

Applications:
V W GROUP Timing Belt Replacement applications – V W V6 and V8 engines in

AUDI		
80	100	A4
A6	S6	A8
S8	RS4	RS6

SKODA
Superb

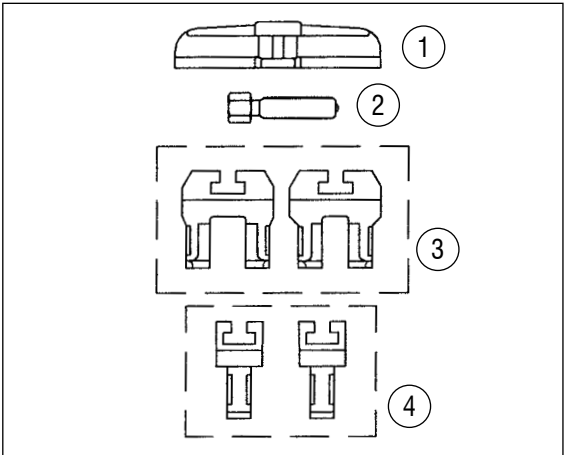

VOLKSWAGEN
Passat Touareg Phaeton

V6 2.4, 2.6, 2.7 & 2.8 Petrol engines
V8 3.7/4.2 Petrol engines
V6 2.5TDi Diesel engines

The V W engines listed in Applications require the camshaft sprockets to be 'free to turn' on the camshaft during the timing belt replacement procedure.

These sprockets are on a tapered shaft and must be released off the taper by using Sprocket Remover AST4848.

Specifically designed to fit between the spokes of VAG camshaft sprockets and to be used in the restricted space on some of the applications.

Set contents/spares
